# **DAP<sup>®</sup> Premium Wood Filler**

# PRODUCT DESCRIPTION

**DAP® PREMIUM WOOD FILLER** is a custom 3-in-1 filler & sealer; wood filler, grain filler and sealer coat. A unique water-based wood filler that allows you to more accurately match existing wood tones to create a repair that is seamless and invisible. Premium Wood Filler accepts all types of stains, tints and finishes in the wet state for an exact match or to add a touch of color to your project. Accepts all types of topcoats and finishes once dry ensuring a flawless finish. Premium Wood Filler can be used as a wood putty, edge filler or crack filler or can be thinned out with water and used as a grain filler to fill natural wood pores to achieve a smooth, tabletop finish. Won't sink, shrink, crack or fall out and is tough enough to handle screwing, planning, cutting, drilling, sawing and routering. Easy to use, easy water clean-up and dries fast allowing you to finish your wood repair or project faster. Interior/Exterior.

PACKAGING	COLOR	UPC
16 fl. oz. (473 mL)	Off-White	7079800550

# **KEY FEATURES & BENEFITS**

- Custom 3-in-1 Filler and Sealer
- Chameleon Technology
  - Mix with stains or pigments for an exact color match
  - Accepts all types of top coats and finishes
- Fill natural wood grain for a smooth finish
- Fast dying formula
- Easy-to-use, water-based formula
- Easy water clean-up & low odor
- Can be sanded, planed, cut, drilled, screwed & nailed
- Won't sink, shrink, crack or fall out
- Thick, knife-grade formula can be molded & sculpted ideal for corners and vertical surfaces

2400 Boston Street |Suite 200 | Baltimore, MD | 21224

- Easy handling spreads smoothly and evenly
- Stainable & Paintable
- Interior/Exterior use

### SUGGESTED USES

Ideal for filling simple wood repairs such as nail holes, gouges, cracks, scratches & imperfections on furniture, woodwork, molding, cabinets, paneling, plywood, windows, doors and painted surfaces. Can be used for specialty carpentry projects; refinishing cabinets, repairing premium instruments and/or custom furniture, or as a grain filler to achieve a smooth, tabletop finish.

#### APPLICATION

#### 1. APPLICATION

Surface must be clean, dry and free of dirt, oil and loose material. De-gloss surface if necessary, for best adhesion. Surface, wood filler and air temperature should be above 40°F. If staining, test wood filler with desired stain on scrap wood before filling to ensure desired stain color. Stain before filling with wood filler, then use stain to develop desired final finish.

#### 2. COLOR BLENDING

If making a custom color, mix the stain or finish directly into the wet wood filler until desired color is achieved, then follow patching and finishing instructions.

#### 3. PATCHING

Stir product with putty knife before application. Press filler into place with a plastic or stainless steel putty knife. Overfill slightly to allow for sanding and settling. If the repair is greater than <sup>1</sup>/<sub>4</sub>" in depth, layer application of product in <sup>1</sup>/<sub>4</sub>" increments. Allow each layer to dry before applying next layer. Allow to dry thoroughly before sanding: approximately 2 hours for shallow fills up to 1/8".

#### 4. GRAIN FILLER

Mix wood filler with warm water for a thick paint consistency. Apply grain filler by brushing across the grain over the entire surface. Wipe away excess material and allow to dry.

#### 5. FINISHING

Sand with medium-grit sandpaper then finish with fine-grit sandpaper to achieve a smooth surface. Wood filler accepts all types of stains, tints or finishes. Color blended wood filler may appear lighter in color after sanding; wipe clean with a damp cloth or apply a clear coat to bring back original color blended appearance. May be painted with latex-based paint or oil-based paint immediately after sanding. Exterior applications must be coated with latex or oil-based paint or solid color stain.

# TYPICAL PHYSICAL & CHEMICAL PROPERTIES

Consistency	Paste	
Vehicle	Acrylic Latex	
Volatile	Water	
Filler	Inert Filler	
Odor	Mild	
Weight/Gallon	16.43 lbs./gallon	
Solids	81%	
Application Temperature	40°F to 150°F	
Service Temperature	0°F to 120°F	
Shelf Life	12 months	
Freezing	Freeze/thaw stable 5 cycles	
Dry Time	2 to 4 hours depending on temperature, humidity and depth of fill	

# CLEAN UP & STORAGE

Wash tools immediately after use with water. Cured product must be cut or scraped away. Be sure container is closed and tightly sealed. Store container in a cool, dry place away from extreme heat or cold.

# SAFETY

See product label and Safety Data Sheet (SDS) for health and safety information. You can request an SDS by visiting our website at dap.com or by calling 888-DAP-TIPS.
